

**NEW AND IMPROVED
NOW WITH DEFROST®**

WHEN IT'S THIS COLD...

**...you want the hardest working Ice
Melter for the harshest conditions.**

**PROFESSIONAL ICE
MELTER**

Our Professional Ice Melter[®] melts more, melts faster and at lower temperatures!

The facts are in... **Professional Ice Melter[®] just works better in difficult conditions.**

Getting superior results from your ice melter is as easy as opening a bag of Professional Ice Melter[®]. Examine the results of the most recent independent laboratory testing.

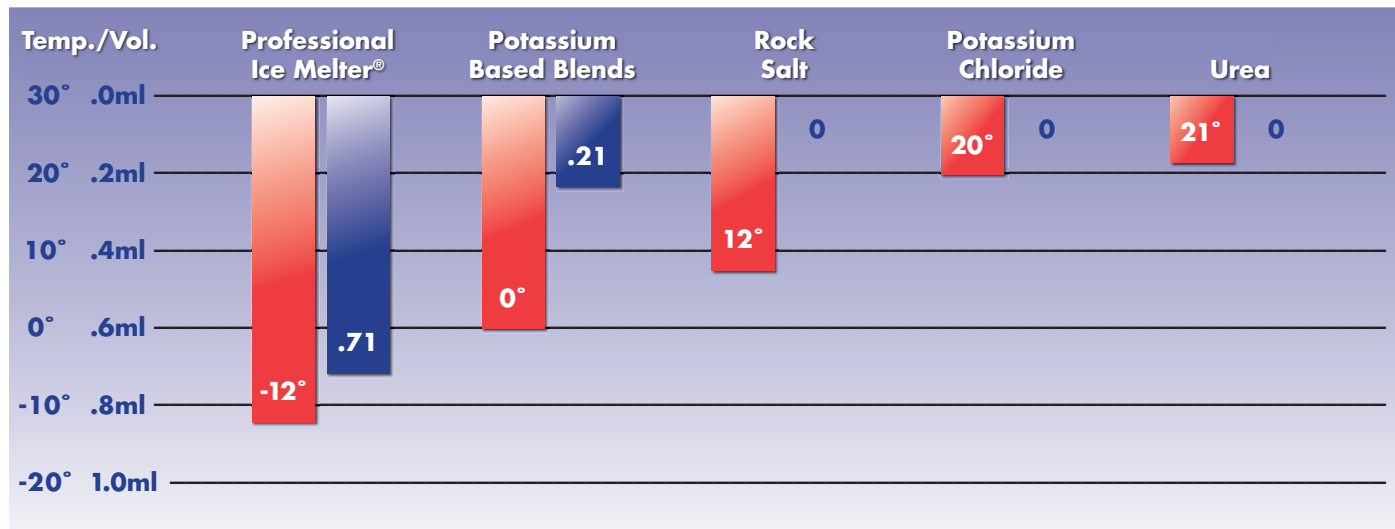

Seeing Blue?

We've taken all the guesswork out of spreading Professional Ice Melter[®].

Accuflow[®] Pattern Indicator

The new blue color is geared to improve smooth and consistent coverage, especially during low visibility conditions. Our pattern indicator is 100% water soluble, non-staining and bio-degradable.

Note: Not available in 10# and 20# packages.

Key: ■ Melting point in degrees Fahrenheit ■ mls. needed per gram in 45 minutes at 5°

- Contains Tech-Grade granules
- Safer to plants
- Melts to -12°F
- No oily residue on carpets
- Resists re-freezing

DEFROST[®]

Professional Ice Melter[®] granules are coated with DEFROST[®], a powerful de-icing agent that works on snow and ice faster than untreated ice melters.

Formulated with "Tech-Grade" granules

Unlike other rock salt-based products, Professional Ice Melter[®] is formulated with improved granule sizing for maximum contact with target areas. The flat surface of the granule provides ideal boring action and is less apt to roll off sidewalks and pavement.

Low toxicity

Gentle on skin and leather and does not require special handling considerations.

Dust Free

For clean application.

Safer to vegetation

While rock salt is deadly to shrubs and grass, Professional Ice Melter[®] works great on ice and snow and won't harm vegetation when used as directed.

Extra tough packaging

Poly bags are industrial strength 6mm quality with anti-slip construction. Boxes are reinforced to with-stand stacking.

Concrete friendly

Professional Ice Melter[®] is specially formulated so it will not chemically attack concrete.

Less corrosive

Special ingredients have been added to reduce corrosion to metal, electrical outlets and automobiles.

Free flowing

Some de-icers can turn rock hard inside their containers resulting in wasted material. Professional Ice Melter[®] is formulated with organic anti-caking agents for prolonged storage with minimum clumping.

Carpet safe

Many ice melters get tracked indoors and leave a "greasy" wet film on hard surfaces – worse yet, some can damage indoor flooring and carpeting. Professional Ice Melter[®] leaves no greasy residue and is easily cleaned from flooring.

Professional Ice Melter[®] comes in variety of package sizes. 10lb, 20lb, 50lb, and 80lb bags, a 70# tub, a 9lb jug, a 50lb box and a 100lb box.
